INDEX TO VOLUME XXI.

A.

Agave Americana, 32.
Age, geological, of reptiles, 359.
Agriculture in the West, 193.
Alloys of bismuth, expansion of, in congelation, 371.
——— of bismuth, tin and lead, 371.
——— of tin and lead, 375.
American Botanical Register, 187.
——— Conchology, by Say, 179.
——— Locust, D. Thomas on, 188.
Ammonia in native oxide of iron, 155.
Analysis of Saratoga and Ballston water, by Dr. Steel, 182.
Animal poison, remedy for, 158.

B.

Birds, cleanliness of, 382.
——— songs of, 164.
Bismuth and its alloys, expansion of, during congelation, 371.
——— tin and lead, alloy of, 371.
Bitterness, destruction of, by carbon, 374.
Blakeman, Wm. N., on inflammable gas in water pipes, 386.
Blood, preservation of, 370.
——— manganese in, 370.
Bloodgood, S. DeWitt, on the Hudson and Mohawk Rail Road, 141, 387.
Bone caves in France, 56.
Botany, Am. edition of Lindley's natural system, 389.
Brewster, David, Dr., on double refraction, 296.
Brilliancy of primary and secondary rainbows, 379.
British association for the promotion of science, 373.
Bromine in mineral waters, 366.
Burnett, Mr., on the functions of vegetable life, 153.

C.

Cantharides, vesicating principle of, 69.
Carbon, power of, to destroy bitterness, 374.
Carpenter, G. W., on cantharides, 69.
——— on materia medica, 184.
Cass, Gen., address to alumni of Hamilton College, 180.
Caustic potassa, 94.
Caves containing bones, 56.
Cement for broken vessels, 149.
Central forces, Prof. Strong on, 66, 334.
Charcoal, manufacture of, 156.
Chlorate of potassa, 92.
Chloric ether, 64, 405.
Chloride of lime, disinfection by, 149.
——— of silver, 369.
Chlorides, 368.
Chlorine an antidote to prussic acid, 157.
Chromium, metallic, process for, 375.
Cleanliness of birds, 382.
Clement's experiment, 380.
Coal formation of Pennsylvania, Mr. Pomeroy on, 342.
Cobalt from Chatham mine, 195.
Coir fibre, 30.
Color, produced by electricity, 378.
Colors, transfer of, by galvanism, 316.
Compression of fluids, 381.
Conchology, American, by Say, 179.
——— elementary work on, 389.
——— marine, Conrad's, 389.
Conducting powers of liquid gases, 374.
Conductors of lightning for ships, 347.
Conrad's Marine Conchology, 389.
Copper ore of Strafford, Vt., 383.
Cordage, Dr. Mease on vegetable materials for, 27.
Cotton, use of, in dressing wounds, 159.
Cotton Gin, 209.
Crocodile, habits of, 163.
Crotalaria juncea, or sun plant, 27.
Cutlery, fine edge to, 165.
Cuvier's Règne Animal, American translation of, 388.

D.

Daubeny, Prof., on iodine and bromine in mineral waters, 366.
Davy, Sir H., original decomposition of potash by, 367.
Dead bodies, disinfection of, 149.
Deluge, proofs of, 14.
Dip of the magnetic needle at St. Petersburgh, 382.
Disinfecting powers of increased temperatures, Dr. Henry on, 392.
Disinfection by chloride of lime, 149.
Dixon, Messrs., manufacture of lead pots by, 196.
Double refraction, Dr. Brewster on, 296
Dykes, 13.

E.

Eames, T., address of, at the opening of the Classical Hall at Brooklyn, 181.
Eaton, Prof., on geological equivalents, 132.
———— Geological Text-Book, 389.
———— stratiographical geology, 199.
Editor, on chloric ether, 405.
———— reminiscences of Eli Whitney, Esq. by the, 255.
Edwards, Pres., juvenile observations of, on spiders, 109.
Eggs, preparation of, for cabinets, 161.
Elasticity restored to feathers, 372.
Electricity, decomposition of water by, 368.
———— production of phosphorescence and color by, 378.
Electro-magnetic apparatus, 86.
Encyclopedia Americana, 187.
Epicycloid, investigation of, 280.

F.

Faraday, Mr., on vaporization, 151.
Faults in geology, 13.
Feathers, elasticity restored to, 372.
Felspar, potash obtained from, 157.
Fine arts, Prof. Gimbrede on, 386.
Flax, 27.
Fluids, compression of, 381.
Formation, geological, 9.
Fowler, Dr., on the sapphire, &c. of Sussex county, N. J. 319.
Franklin Institution of New Haven, 185.
Fructification of mosses, 171.
Fulminating preparations, 288.
Fulminic acid and fulminates, 293.

G.

Gale, L. D., processes for potassium, 60.
Galvanic ignition in rock blasting, Dr. Hare on, 139.
Galvanism, transfer of colors through animal substances by, 316.
Gases, liquid, conducting powers of, 374.
Geography, physical, 127.
Geological age of reptiles, 359.
———— equivalents, Prof. Eaton on, 132.
Geology, principles of, by Mr. Phillips, 1.
———— of part of Connecticut, 94.
———— of the Highlands of N. Y., 97.
———— of Orange Co. N. Y. and Sussex Co. N. J., 321.
———— stratiographical, Prof. Eaton on, 199.
Gimbrede, Prof., on fine arts, 386.
Gold, Russian mines of, 372.
Griscom, Prof., address of, to the Newark Mechanics Association, 180.
Gunpowder, 93, 292.
Guthrie, S., on caustic potassa in making chlorate of potassa, 94.
Guthrie, S., on chloric ether, 64, 405.
———— on chlorate of potassa, 92.
———— on fulminating preparations, 288.
———— on fulminic acid and fulminates, 293.
———— on gunpowder, 93, 292.
———— on molasses from potatoes, 93.
———— on oil of turpentine, 93, 291.
———— on sugar from potatoe starch, 284.
———— on the vaporization of mercury in nitric ether, 90.

H.

Halo, notice of, by J. W. Tyler, 189.
Hardness of lead, 167.
Hare, Dr., on galvanic ignition in rock blasting, 139.
Harris, Mr., on lightning conductors in ships, 347.
Hayes, A. A., on cobalt and nickel, 195.
Hazard, Mr., on the hyperbola, 314.
Heat and vapor, Prof. Johnson on, 71, 304.
Hemp, 27.
Henry, Dr., on the disinfecting powers of increased temperatures, 392.
Hentz, Mr., on North American spiders, 99.
Hibiscus roseus, 36.
Holley, M., address of, to the Wayne Co. Education Society, 181.
Horses, power of, 167.
Horticulture in the West, 193.
Hudson and Mohawk rail road, Mr. Bloodgood on, 141, 387.
Hurricane of August, 1831, W. C. Redfield on, 191.
Hyperbola, Mr. Hazard on, 314.

I.

Illumination of light houses, 366.
Inflammable gas in water pipes, 386.
Insects, killing of, 162.
Iodides, 368.
Iodine, acidification of, by nitric acid, 376.
———— in mineral waters, 366.
Irving, J. T., address of, to the alumni of Columbia College, 181.
Iron, prevention of, from rusting, 150.
—— oxide of, containing ammonia, 155.
Island, volcanic, in the Mediterranean, 399.
Ives, Prof. E., on chloric ether, 406.
Ives, Dr. N. B., on chloric ether, 407.

J.

Jet d'eau under water, 379, 380.
Johnson, A. B., address of, to the New York state Lyceum, 181.
Johnson, E. F., on the epicycloid, 280.

Johnson, W. R., on heat and vapor, 71, 304.
——— on the rotascope, 265.
Jones, Dr., on the agency of galvanism in transferring colors, 316.
Joslin, Prof., on electro-magnetic apparatus, 86.
Journal of a naturalist, 390.
——— of the Philadelphia College of Pharmacy, 173.

K.

Kent, Chancellor, address of, to the Phi Beta Kappa society of Yale Coll., 391.

L.

Lamp glasses, cracking of, 165.
Latitude determined at sea, 187.
Laterrade, J. F., on the existence of the unicorn, 123.
Lead, alloy of, with bismuth and tin, 371.
—— and tin, combustion of an alloy of, 375.
—— hardness of, 167.
—— pots, manufacture of, 196.
Light houses, illumination of, 366.
Lightning conductors for ships, 347.
Lindley's Botany, Am. edition of, 389.
Lime, oxalate of, in plants, 372.

M.

Malic acid, 156.
Manganese in blood, 370.
——— ores of, Prof. Turner on, 364.
Mantell, Mr., on the geological age of reptiles, 359.
Materia Medica, improved articles of, 184.
Mather, Lieut., geological notices by, 94.
Mease, Dr., on vegetable materials for cordage, 27.
Memoir of Eli Whitney, Esq. by Prof. Olmsted, 201.
Mercury, vaporization of, in nitric ether, 90.
Metre and English yard compared, 382.
Mineral waters containing iodine and bromine, 366.
Mineralogy of Orange county, N. Y. and Sussex county, N. J., 321.
Mineralogy, treatise on, by C. U Shepard, 389.
Mines of gold and silver in Russia, 372.
Mohawk and Hudson Rail road, 141, 385.
Molasses from the potatoe, 93.
Morphine, sulphate of, Dr. Tully on, 49.
Mosses, fructification of, 171.
Musa textilis, 29.

N.

Names, scientific, of certain plants, 384.
Narcotine, Dr. Tully on, 44.
Naturalist, journal of a, 390.
Needle, magnetic, dip of, at St. Petersburgh, 382.
Nickel of Chatham mine, 195.
Nitric acid, action of, on iodine, 376.
Nomenclature, chemical, Prof. Whewell's, 369.

O.

Olmsted, Prof., Memoir of Eli Whitney, Esq. by, 201.
Optical experiments, 166.
Orange county, N. Y., mineralogy and geology of, 321.
Organic fossils, 10.
Ornithological terms improved, 162.
Oxalate of lime in plants, 372.

P.

Pennsylvania coal formation, Mr. Pomeroy on, 342.
Pennsylvania, scenery of, 197.
Phenomenon, singular, 198.
Philadelphia college of pharmacy, journal of, 173.
Philadelphia, population of, 194.
Phillip's geology, 1.
Philosopical society, Yorkshire, 168.
Phormium tenax, 37.
Phosphorescence by electricity, 378.
Plants, oxalate of lime in, 372.
——— scientific names for, 384.
Pomeroy, S. W., on the coal formation of Pennsylvania, 342.
Population of Philadelphia, 194.
Position of rocks, 12.
Potash, original decomposition of, 367.
——— from felspar, 157.
Potassium, processes for, 60.
Potatoes, planting of, 159.
——— molasses from, 93.
——— starch, sugar from, 284.
Power of horses, 167.
Preservation of blood, 370.
——— of trees from hares, 159.
Prussic acid, antidote to, 157.

R.

Rail road, Hudson and Mohawk, 141, 385.
Rainbows, acoustic, 381.
——— primary and secondary, brilliancy of, 379.
Redfield, W. C., on the collapsing and explosion of steam boilers, 190.
Redfield, W. C., on hurricane of August, 1831, 191.
Refraction, double, Dr. Brewster on, 296.
Regne animal, Cuvier's, American translation of, 388.

Reminiscences of Eli Whitney, Esq. by the Editor, 255.
Reptiles, geological age of, 359.
Rivers, action of, 23.
Rock blasting, galvanic ignition in, 139.
Rotascope, W. R. Johnson on, 265.
Russian mines of gold and silver, 372.

S.

Saguerus, 36.
Salicine, 155.
Salt a remedy for animal poison, 158.
Sapphire of Sussex county, N. J. 319.
Saratoga and Ballston waters, analysis of, 182.
Say's American conchology, 179
Schroeder, Rev. J. F., address at the opening of the New York dispensary, 181.
Science, British association for the promotion of, 373.
Science in the South, 188.
——— in the West, 187.
Sea, action of, 21.
Sealing wax, making of, 150.
Sedgwick, Rev. A., address before the geological society of London, 186.
Shepard, C. U., treatise on mineralogy, 389.
——— on copper ore of Strafford, Vermont, 383.
——— on the mineralogy and geology of Orange county, N. Y. and Sussex county, N. J., 321.
Ships, lightning conductors for, 347.
Sida abutilon, 37.
Silver, chloride of, 369.
——— Russian mines of, 372.
Size, composition of, 168.
Skulls, 197.
Solvent power of hard waters, 150.
Songs of birds, 164.
Southern Agriculturalist for July, 182.
Spiders of North America, Prof. Hentz on, 99.
Steam boilers, collapse and explosion of, 190.
Steel, Dr. analysis of the Saratoga and Ballston water, 182.
Steel, prevention of, from rusting, 150.
Stratiographical geology, Prof. Eaton on, 199.
Strong, Prof., on central forces, 66, 334.
Subterranean forests, 23.
Sugar from potatoe starch, 284.
Sussex county, N. J., minerals of, Dr. Fowler on, 319.
——— mineralogy and geology of, C. U. Shepard on, 321.

T.

Tables to determine latitude at sea, 187.
Temperance, 194.
Temperatures, increased, disinfecting power of, 392.
Terms, ornithological, improved, 162.
Text book, Prof. Eaton's geological, 389.
Thomas, D., on American locust, 188.
Tin, alloy of, with bismuth and lead, 371, 375.
Touchwood, 163.
Trees, preservation of, from hares, 159.
Tully, Prof. on narcotine and morphine, 39.
Turner, Dr. on ores of manganese, 364.
Turpentine, oil of, 93, 291.
Twine and thread, vegetable materials for, 27.
Tyler, J. W., notice of a halo by, 189.

U.

Unicorn, existence of, 123.

V.

Vapor and heat, W. R. Johnson on, 71, 304.
Vaporization, limits of, 151.
Vauquelin's process for obtaining metallic chromium, 375.
Vegetable life, functions of, 153.
——— tenacity of, 158.
——— materials for cordage, &c., 27.
Volcanic island in the Mediterranean sea, 399.
Volcanoes, 24.
Voltaic pile, action of, on living animals, 157.

W.

Water, hard, solvent powers of, 150.
——— decomposition of, by electricity, 368.
Weed, W. B., on scenery in Penn., 197.
Whewell's, Prof., chemical nomenclature, 369.
Whitney, Eli, Esq., memoir of, by Prof. Olmsted, 201.
——— reminiscences of, by the Editor, 255.
Wounds dressed with cotton, 159.

Y.

Yard, English, compared with the French metre, 382.
Yorkshire philosophical society, 168.
